JBIS

Journal of the British Interplanetary Society

VOLUME 51 **1998**

INDEX

EDITORS	*THEMES*
Bavin R.	Small Satellites
H. Benaroya	Lunar Commercial Development (Part II)
D. Day	Cold War Military Space History (Part 3)
R. Hall	Soviet/CIS Astronautics (Part 13, 14 and 15)
S. Santoli	Exobiology (Part 7)
S. Santoli	From Microsystems to Nanotechnology for Space Missions
R.L.S. Taylor	Sub-Critical Impact (Part 1)
F. Winter	Pioneering Rocketry and Spaceflight (Part 7)
K. Wright	Vision 60 Plus (Part 2)
R. Zubrin	Planetary Exploration

AUTHOR INDEX

Arkhipov A.V.	Earth-Moon System as a Collector of Alien Artefacts	181
Baxter S.	The Hidden Ocean: Mining Deep Water on the Moon	75
Blott R.J., Wells N.S. & Eves J.	The STRV 1 Microsatellite Series: The Rapid, Low Cost Route for Innovative in Orbit Technology Testing	387
Brenner D.W., Schall J.D., Mewkill J.P. & Shenderova O.A.	Virtual Design and Analysis of Nanometer-Scale Sensor and Device Components	137
Clark K.	UOSAT-12: The First Flight of Surrey's Multi-Mission Minisatellite Platform	363
Clark P.	Satellites Launches Using the Cosmos -2/2M Launch Vehicles - Part 1	403
Coolbaugh J.S.	Genesis of the USAF's First Satellite Programme	283
Eskov Y.M.	A Lunar-Fuel Universal System for the Transport Spacecrafts Provided with the Low- and High-Thrust Rocket Engines	69
Foley S.	CCSDS Communications Standards on STRV	376
Franklin C.E.	The Hale Rocket in the British Service (Part 1)	337
Globus A. Bailey D., Han J., Jaffe R., Levit C., Merkle R. & Srivastava D.	Aerospace Applications of Molecular Nanotechnology	145
Gorin P.A.	Black "Amber": Russian Yantar-Class Optical Reconnaissance Satellite	309
Hansson A.	From Microsystems to Nanosystems	123
Harford J.	Korolev: A Western Perspective	19
Haw R.J., Antreasian P.F., Graat E.J., McElrath T.P. & Nicholson F.T.	1989 - 1995: A Galileo Navigation Space Odyssey	83
Hempsell C.M.	A History of Space and Limits to Growth	323
Hempsell C.M.	Long Term Growth Targets for the Space Infrastructure	243
Hendrickx B.	Kamanin Diaries 1964 - 1966	413
Hendrickx B.	The Origins and Evolution of Mir and Its Modules	203
Johnson N.L.	Forty Years of Earth Satellites - and a Look Forward	223
Kasman F. *et al*	Proton - Development of a Russian Launch Vehicle	3
Kecskes C.	The Possibility of Finding Traces of Extraterrestrial Intelligence on Asteroids	175
Keyte G. & Thornbury A.	Small Satellite SAR	381
Koelle D.	Lunar Launch Vehicle Systems Options and Economics	57
Koelle H.H.	Spaceflight in the 21st Century: Projections, Plans, Chances and Challenges	251
Landis G.A.	The Fermi Paradox: An Approach Based on Percolation Theory	163
Lawes R.A.	Microsystems and How to Access the Technology	127
Liepack O.G.	Necessary Precursor Missions for Planning a Lunar Base	65
Lorenz R.D.	Mikrotektite Dispersal from Subcritical Impact Events on Earth: Impact Fluence on Spacecraft	471
Maccone C.	A Classification of Quadric Wormholes According to The "Matter" Requested for Interstellar Travel	185
Matloff G.L.	The Near-Earth Asteroids: Our Next Interplanetary Destinations	267
McKendree T.	Design Considerations for Carbonaceous Asteroid Assemblers	153
Morrow J.R., Sandbert C.A., Warme J.E. and Kuehner H-C.	Regional and Possible Global Effects of Sub-Critical Late Devonian and Alamo Impact Event, Southern Nevada, USA	451
O'Dale C.D.	The Development of a Commercial Lunar Infrastructure	49
Onkst D.H.	Check and Counter-Check: The CIA's and NRO's Response to Soviet Anti-Satellite Systems, 1962-1971	301
Parkinson R.C.	Review of Rationales for Space Activity	275
Remo J.L.	An Approach to Assessing the technological Cost/Benefits of Critical and Sub-Critical Cosmic Impact Prevention	461

Santoli S.	Man/Alien Dialogues - A Nanobiologist's Perspective	195
Shayler D.J.	Outside Mir: Ten Years of EVA Operations	29
Siddiqi A.A.	First to the Moon	231
Spiering V.L., van der Moolen J.N., Burger G.-J. & Van Den Berg A.	Technologies and Microstructures for Separation Techniques in Chemical Analysis	133
Thompson W.B., Stern M.O. & Dubin D.H.E.	A Skyhook from Phobos to Mars	99
Tough A.	Small Smart Interstellar Probes	167
Ward A.K., Barrington-Brown A.J. & Gardner S.J.	Development of Project Specific Hardware	371
Williams I.P.	Sub-Critical Impact Events: The Origin of the Impactors	445
Woodcock G.R.	Prospects for Lunar Commercial Development	43
Zubrin R.	A Comparison of Methods for the Mars Sample Return Mission	116

SUBJECT INDEX

Artillery rockets 337
Asteroids,
  Earth impact effects 451,471
  impact prevention 461
  mining 153,267
  missions 267
  origin 445
Book Reviews 39
Comets, origins 445
Corona satellites 283,301
Cosmos-2/2M launch vehicle 403
Cosmos satellites 403
Correspondence 180,239,359
Earth Observation 381
Extra-vehicular Activity, Mir 29
Fermi paradox 163
Galileo probe navigation 83
Hale rockets 337
Impact events, effects 451,471
  prevention 461
Infrastructure, future plans 243,251
  Lunar 43,49
  Lunar transport 57,69
  Martian Skyhook 99
Interstellar probes 167
Interstellar travel
  Wormholes 185
Kamanin, N.P. 413
Korolev, S.P. 19
Launch vehicles, Cosmos-2/2M 403
  Proton 3
  Thor-Agena 283
Limits to growth 323
Luna probes 231
Mars exploration
  in situ propellant production 116
  sample return 116
  Skyhook 99
MEMS/
  Microelectromechanical systems 123
Microcomponents 137
Microfabrication 127,133
Microsatellites 371,376,387
Microsystems 123,145
  aerospace 145
  asteroid mining 153
  chemical analysis 133
  MEMS 123
Minisatellites 363
Mir Space Station, EVA 29
  Origins and evolution 203
Moon
  commercial use 43,49
  exploration 65
  early missions 231
  resources 69,75
  settlement 43,49
Nanotubules 137
Navigation, Galileo probe 83
Planetary probes 83,116
Policy for space 243,251,275
Population growth 323
Propulsion
  Lunar 57,69
  Lunar propellants 69
  Martian propellants 116
Proton launch vehicle 3
Reconnaissance satellites
  Corona 283,301
  Yantar 309
Resources 251
  asteroid mining 153,267
  limits to growth 323
Satellites, population 223
  systems 363,371,376,387
Search for extraterrestrial intelligence 167,175,181,195
Skyhook 99
Soyuz history 413
Space debris 223
Space Station, Mir 29,203
STRV 376,387
Synthetic Aperture Radar 381
Thor-Agena vehicle 283
US Air Force satellites 283
UoSAT 363
Voskhod history 413
Wormholes 185
Yantar satellites 309
